-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,6,7,11,13,15,18,20, 21 and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hyman et al.

See coupling member 30, receptive member 26. The first section is defined by 40. The second section is a portion of planar section 26,46, upon which member 30 could be placed, while attached to a cord, and if the cord is attached to one leg of 30 and is pulled in a certain direction, such as through the opening in this section, member 30 would not detach from planar section 26,46. Also, the hole and sections 26,46, could “receive” via wedging, wrapping with the cord, etc., the member 30 so that it could not be separated. A third section is another portion (the other side) of planar section 26,46, and the coupling member would detach if the cord was pulled in a lateral direction. The recitation of a “greater force” is met since a greater force would also accomplish what a lesser force would accomplish. The term “punch out section” does not infer any inherent structure without additional description of it’s structure. Consequently, any portion, such as a portion of planar section 26,46, could be removed.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5,10,14,19 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hyman et al.

The material used for the device is clearly an obvious design choice. It would have been obvious to use the specific material recited due to it's well known inherent features.

Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nien in view of Johansson.

Nien discloses several embodiments which provide a breakaway for the attached end of the cord. Merely replacing such connections as disclosed in Nien with that of Johansson would have been an obvious substitution of parts.

### ***Allowable Subject Matter***

Claims 2,3,8,9,12,16,17,22,23 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
